GekoConnect – Colour & Font Guide

Version: Updated with logo-derived palette and sketch effects

Font

- **Primary Font (Headings):** Syne
 - Loaded from Google Fonts
 - Declared in `index.css` and `index.html`
 - Replaced **Outfit** across all headings
- **Body / UI Text:** Inter or system sans-serif (as per existing design)

Colour Palette

Mapped directly from the **Geko logo pixels**:

Colour Name	Hex	CSS Value	Usage
Primary	#9040D4	<code>hsl(270 63% 54%)</code>	Main brand colour, accents, links
Gecko Magenta	#C838CC	—	Highlights, calls-to-action
Gecko Blue	#60A6DD	—	Secondary accents
Gecko Deep Blue	#3D7ACF	<code>--color-gecko-deep</code>	Depth & contrast

Visual Colour Swatches (add in Word)

Primary — #9040D4 (logo purple)

Gecko Magenta — #C838CC (replaces candy-pink)

Gecko Blue — #60A6DD (replaces candy-blue)

Gecko Deep Blue — #3D7ACF

Background Gradient Swatch (add in Word)

Blue (top-left) → Purple (top-right) → Magenta (bottom-right)

CSS Utilities & Effects

- **.gecko-gradient**
Exact logo gradient used on buttons, stats section, nav highlights.
- **.gecko-gradient-text**
Same logo gradient applied as clipped text on headings and important labels.
- **.sketch-card**
Hand-drawn depth illusion via offset box-shadow stack (3px/4px diagonal).
- **.sketch-grain**
Subtle SVG turbulence noise overlay at **3.2% opacity** on hero and stats sections.

Implementation by File

- **Landing.tsx**
All previous purple/pink gradients replaced with logo colours.
Feature cards use `.sketch-card`.
Hero + stats sections use `.sketch-grain`.
Blobs updated to exact logo hex values.
 - **Login.tsx + SetPassword.tsx**
Logo-tinted background.
Submit buttons use `.gecko-gradient`.
Form cards use `.sketch-card`.
 - **Shell.tsx**
Mobile sidebar header and user avatar use `.gecko-gradient`.
Mobile bottom nav active items use `.gecko-gradient`.
-

Brand Direction:

Vibrant, energetic, and rooted in the gecko logo with a playful sketchy/hand-drawn texture layer for personality and depth.
